CLEACE

The Ace of International Disinfection

For tens of thousands of years, deadly germs have brought countless disasters and panics to human society. People urgently need a safe, convenient and efficient daily disinfection product.

In an experiment, Dr. CLEACE, an internationally famous scientist, accidentally discovered a disinfection weapon that is highly effective, safe and gentle to the human body -- a 75% instant hand sanitizer. It is known that 75% is the most effective alcohol bactericidal concentration. Thus, according to the results of this study, Dr. CLEACE successfully applied 75% alcohol to daily disinfection products and pioneered the development of a 75% instant hand sanitizer, and named it "CLEACE".

CLEACE = CLEAN + ACE, "ACE" means the outstanding trump card.

CLEACE 75% instant hand sanitizer is green and safe, whose sterilization rate is as high as 99.99%.

After becoming the hot water-free hand sanitizer brand in the world, CLEACE entered the domestic market and successively launched a series of daily chemical products such as hand sanitizer, washing powder, soap, detergent, etc., focusing on scientific research, and deeply improving product quality. Recognized and trusted by thousands of consumers, CLEACE will continue to work hard to create a cleaner and safer living environment for global consumers in the future!
